

"...ce dangereux supplément..."

three phonetic studies
for solo voice
(with optional electronics & video)

Ethan Hayden
2014-15

Program Note:

"...ce dangereux supplément..." is a collection of phonetic studies for voice, video, and electronics. A suite of three pieces [(tRas), (spɛktʁ), and (sɔ̃dʁ)] the work is based on a close examination of the sounds used in everyday linguistic activity, which are juxtaposed against more extreme vocal effects. The live performance is supplemented with electronic voices which stretch and transform this common vocality. The visuals range from rapid-fire successions of symbols from the International Phonetic Alphabet, to more suspended meditations on elaborately arranged orthographic tapestries made from the same symbols.

"...ce dangereux supplément..." is a poetic rehearsal of the Derridean supplement, that unbelonging excess in a binary opposition which is (contradictorily) crucially indispensable. This takes place throughout the work via a dialectic between linguistic articulation (consonants) and voiced intonation (vowels). While moving between these two poles, the performer acts out a futile search for the primary referent (or "master signifier"), but eventually realizes all that is to be found is an infinite hauntology, a spectral chain of traces, specters, and cinders.

Performance Note:

The component studies of *"...ce dangereux supplément..."* may be performed together (in any order) or separately. The electronic accompaniment and projected animations are considered "supplements" to the work itself, and thus each may or may not be included in the performance.

[1:10]

A complex geometric diagram illustrating a space-time manifold. It features several planes and curves. A large, irregular red-shaded region occupies the lower right portion of the diagram. Other regions are outlined in black. Labels include 't' and 'p' near the top left, 'r' in the center, 'R' in the top right, and 'h' in the bottom center. The diagram uses dashed lines for hidden features and arrows to indicate directions or flow.
